

Picklight-S and Picklight-D New Circuit Board Exchange

Are you having your EasyPick circuit boards from Real Time Solutions/FKI Logistex/Honeywell Intelligrated repaired? You can have brand new circuit boards instead!

EA Manufacturing is now manufacturing new circuit boards to replace EasyPick pick to light systems circuit boards. Don't have your old boards repaired when you can have brand new circuit boards for about the same price as you are paying to have them repaired. The original circuit boards have pushbutton switches and several other components that are obsolete and no longer available. We have redesigned the boards to use a very high quality pushbutton switch and other components that are available and supportable.

- **All brand new components for long life**
- **Very high quality pushbutton switches rated for 10,000,000 actuations**
- **Keycaps that will not fall off**
- **Refurbished housings are cleaned and inspected**
- **Boards are attached with two screws for security**
- **High quality jacks are used for secure connections**
- **We keep units in stock for fast turn-around times**
